MESSAGE

Oral health is essential for good health and quality of life. Oral diseases like dental caries, periodontal disease, malocclusion and oro-pharyngeal cancers are a major public health problem worldwide due to huge health and economic burden on individuals, families, societies and health care systems. The key oral diseases like dental caries and periodontal disease are major contributors to disease burden affecting 70% to 95 % of the population in India.

Regional Training Centre for Oral Health Promotion and Dental Public Health in Madhya Pradesh (RTCOHP) at AIIMS, Bhopal has been established with a mandate for evidence based training and teaching activities for developing a trained oral health workforce & performing high quality research which focuses on preventing oral diseases and promoting oral health among people of Madhya Pradesh. RTCOHP will be conducting a Oral Health Survey as per WHO's guidelines among all 51 districts of Madhya-Pradesh and will also develop a "Oral Health Data Bank in Madhya Pradesh" - a first in the country, analogous to WHO'S Data Bank.

I on behalf of myself and All India Institute of Medical Sciences, Bhopal welcome you all to RTCOHP. We look forward to collaborate and share our expertise for uplifting the oral health among the people. Enjoy the trip to the City of Lakes.

Prof. (Dr.) Sarman Singh
